## Tissue-Tek Prisma® Plus & Tissue-Tek Film® Automated Slide Stainer and Film Coverslipper

*Imagine... ultimate time saving,  
supreme flexibility and superior  
reliability in staining and coverslipping*

continuous innovation for pathology

**Where ultimate time saving  
meets supreme flexibility and  
superior reliability**

---

## Tissue-Tek Prisma<sup>®</sup> Plus & Tissue-Tek Film<sup>®</sup>

The Tissue-Tek Prisma<sup>®</sup> Plus & Tissue-Tek Film<sup>®</sup> integrated system is the gold standard in staining and film coverslipping. This provides true walk away capability and continuous confidence in performance and quality due to its unsurpassed system up-time.

The flexibility of standard and special staining in a single system, with the use of proven film coverslipping technology makes this a cost efficient method of producing high quality stained slides.

### **Confidence in performance and quality:**

- Ultimate time saving
- Supreme flexibility
- Superior reliability

## Total Staining and Coverslipping Solution

Creating confidence in the laboratory that they can easily manage their costs, whilst achieving a rapid turnaround time with consistent high quality slide delivery is most effective with a total solution for staining and coverslipping.

Combining the Tissue-Tek Prisma *Plus* and Tissue-Tek Film system with quality consumables such as the gold standard Tissue-Tek® Coverslipping Film and a selection of added value Sakura Services provides the laboratory with this total solution.

## Ultimate time saving

Time is of the essence, virtually every histopathology lab is pushed on turnaround times and faces increasing workload, often with reduced staff and with equal or less financial resources. The integrated Prisma *Plus* and Film is the ultimate time saver, freeing your staff for other important tasks.

The continuous loading and unloading of multiple runs without start delays, the confidence in a standardised staining result and reliable high quality coverslipping allows for true walk away capabilities. This decreases valuable user time spent waiting or reworking poor quality slides.

The increased scheduler efficiency, the use of Film technology to replace glass coverslips and liquid mountant just adds to the already formidable performance reducing the maintenance time and costs.

User training ensures that the laboratory is using and maintaining the system efficiently, ensuring the high quality and reducing the turnaround time of the slides.

## Supreme flexibility

Customers have greatly appreciated the convenience delivered by the integrated Prisma Film stainer coverslipper. This is due to the flexibility of having a single platform to easily perform H&E and special stains reducing hands on time, maintenance time and service costs.

Added to this, having the choice of reagents, reagent container configurations and user defined programs comprise the ideal automated stainer for a wide variety of demands and requirements.

The improved user interface on the Prisma *Plus* allows 50 different colours for coding the reagent containers. This ensures high quality staining due to accuracy in reagent changing.

## Superior Reliability

The Prisma *Plus* and Film coverslipper have been designed, engineered and built to provide the laboratory with an integrated stainer coverslipper having a pedigree of dependability and reliability. This ensures a smooth workflow through continuous loading and high quality staining slide after slide.

The Prisma *Plus* and Film is world renowned for its high level of system uptime instilling confidence that the system is available when needed. This is produced and maintained by providing excellent service support and preventative maintenance.

Sakura has further enhanced reliability with the introduction of *iSupport* for the Prisma *Plus*. This real time remote monitoring system will reduce the adverse impact of instrument failure by increasing the already impressive uptime rate on the systems as it enhances the speed of repair.

 Tissue-Tek® Film™

# The total staining and coverslipping solution

Total staining and coverslipping solutions provide you with the ability to obtain quality consumables and value added services to complement the Prisma *Plus* and Film systems. This will ensure your laboratory can achieve a cost efficient, quality staining and coverslipping service.

## Products

- 6172 Tissue Tek Prisma® *Plus* Standard
- 6173 Tissue Tek Prisma® *Plus* Special
- 4742 Tissue-Tek Film® Coverslipper 220V 50/60Hz
- 6134 Prisma and Film Link

## Consumables

### 4770 Coverslipping film

### Full Microscope slides portfolio

Sakura offers a wide range of microscope slides for everyday use in IHC/ISH, suitable for every situation.

Tissue-Tek® Microscope slides are available as:

- Non-adhesive
- Adhesive
- Advanced adhesive

Visit [sakura.eu](http://sakura.eu) for more information on the available slides.

## Sakura Services

Sakura's range of histopathology services is designed to assist you to meet the challenges you and your laboratory face on a day to day basis. These will position your laboratory optimally in a competitive world and place you ahead of time. Complementing the high quality instruments and consumables we are known for, our services help you to become more efficient, reduce your turnaround times and increase the quality of your work.
